SafeCoat[®] FR31, FR41, FR31S, FR31 Stainguard Fire Retardant Treatments

SafeCoat products are highly effective, environmentally friendly and economical fire retardant treatments. They can be used to fire retard fabrics, straw, cardboard paper and practically all water absorbent materials.

- Apply by spraying, padding or immersion
- Colorless, odorless
- Does not substantially affect feel or appearance of fabric
- Water soluble, can be washed out
- Ready-to-use liquid form
- Chemically neutral pH 7.0 to 8.0

FR31

Highly effective for most fabric, both natural and synthetic. Tested to meet CAN/CGSB 4.2 27.1MS on 100% cotton, 100% polyester and 65/35 cotton/polyester blend. Also effective on cardboard and paper.

FR31S

Specially formulated to treat straw, hay, cardboard and paper.

FR41

Formulated to be used as an exterior/interior absorbent fire retardant which provides excellent protection against grass and wild fires. Used on a wide variety of substances. Highly effective on wood, wood base products, dry vegetation and all materials where fire protection is desired.

FR31 Stainguard

Same fire retardant formulation as FR31 with the addition of a highly effective stainguard which will protect against water and oil based stains.
